Setup the Joystick IPEGA 9076 on Windows

By cable:

1. Connect the USB cable on the PC without connecting the other end to the joystick;
2. Press "start" and connect the cable to the joystick (led 2 will turn on);
3. Press "home" for 5 seconds (led 3 will turn on).

At this moment, the joystick is already setup as a Xbox 360 for windows controller. To verify, open the app "joy.cpl".
